RE: requested four way stop at intersection of Appleton + Stricklersville Roads in Landenberg Pa. Our family is under agreement to purchase the farm at 3201 Appleton Rd. Landenberg Pa. We are writing to ask your consideration of installing a four way stop at the intersection of Stricklersville and Appleton Rds.

Our family will be operating a dairy in the existing barn which is on the South East Corner of the intersection and living in the house which is on the North West corner of the intersection. Our concern is that our children will need to cross the road multiple times a day in order to operate our family farm there at the property and the existing traffic runs very fast through the intersection on Appleton Rd. We feel that if there were a four way stop at the intersection it would be much safer for our children and also for vehicle drivers who would be crossing through a working farm.

We very much appreciate your consideration

Thank you so much

Samuel + Sallie Stoltzfus
